

# DAILY WATER SUPPLY SYSTEM STATUS UPDATES

Water supply status update by exception (i.e., areas affected due to supply constraint and not service interruption from occasional pipe burst). **Tuesday, 20 February 2024 (Morning)**

## UNPLANNED MAINTENANCE

### Kensington B update

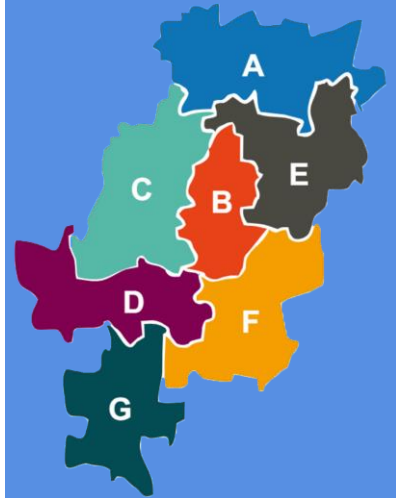

Johannesburg Water is aware of the water supply issues in the Kensington B area, which are a result of repairs that were carried out on Sunday, 18 February 2024, leading to low water levels at the Kensington B tower and reservoir.

The tower levels are steadily increasing. The Entity's teams will continue to monitor the situation and remove airlocks in the system to improve water flow.

Further updates will be provided.
